How good are our schools? Dr. Conant reports (Motion picture) National Education Association, 1959. Made by Agrafilms.

29 min., sd., b&w, 16 mm.
Based on the book *The American high school*, by James B. Conant.
Summary: Uses two comprehensive high schools—one in Oakland, Calif., and the other in Labette County, Kan.—to show what every secondary school should be equipped to do. Shows various classroom situations illustrating how the schools provide for the varied interests of all the students in their communities. Includes views of Dr. Conant presenting his findings to government and National Education Association officials.
Credits: Producer, Arthur D. Morse; narrator, Ralph Bellamy.

- The human body: Muscular system (Motion picture) Coronet Instructional Films, 1962.
14 min., sd., color, 16 mm.
With teacher's guide.
Summary: Discusses the three types of muscle which make up the human muscular system. Uses photomicrography, models, and animation to explain the structure and function of voluntary muscle tissue and laboratory demonstration to illustrate the role of the nerve impulse in muscular contraction. Describes the role of ATP in the complex chemical process of muscular movement.

Hydrogen (Motion picture) Coronet Instructional Films,
1959.

14 min., sd., color, 16 mm.

With teachers guide.

Summary: Traces the historical background of the discovery of hydrogen, shows how it is produced in the laboratory and commercially, and reviews its properties, including the electron theory of covalence. Discusses important industrial uses of hydrogen which include new developments utilizing hydrogen in the field of nuclear energy.

Credits: Collaborator, Frederic B. Dutton.

Hypnosis: a psychiatric study (Motion picture) Medical
Film Guild (n. d.)

20 min., sd., color, 16 mm.

Also known as Hypnosis: a psychiatric tool.

Previously released under the title A multiple personality.

Summary: A study by the Department of Psychiatry, Columbia University. Questions from investigating psychiatrists, directed to a patient in a state of hypnosis, show the normally hidden interactions and the operation of conscious and unconscious mental mechanisms. Explains that the patient's mind in desperate defense against intolerable inter-psychotic conflicts and anxiety develops four mutually amnesic sub-personalities.

Imperforate anus with low rectovaginal fistula (Motion picture) Patrick H. Hanley. Made by Dept. of Photography, Alton Ochsner Medical Foundation. Released by Alton Ochsner Medical Foundation, 1959.

14 min., sd., color, 16 mm.
Summary: Illustrates the surgical technique used in correcting imperforate anus type III with low rectovaginal fistula, with preservation of the external anal sphincter. Shows mobilization of the rectum from the posterior vagina, and perineal and levator muscles through a circular incision about the vaginal fistula. An incision through the skin over the center of the external sphincter permits pulling the mobilized rectum through an intact sphincter. The rectum is sutured to the skin and perineorrhaphy closes the wound defect in front of the rectum.

India: Customs in the village (Motion picture) F. W. & E. S. Von Keller. Released by Encyclopedia Britannica Films, 1957.

11 min., sd., color, 16 mm.

Previously released under the title India: Life in the village.

With teacher's guide.

Summary: Illustrates various aspects of life in a small village in the state of Rajasthan in northern India, where centuries-old customs have remained almost unchanged. Describes the ways in which the caste system regulates Indian life; shows the primitive ways of working and living in the village; highlights the festivities attending a wedding procession and celebration; and dramatizes the effects of a devastating drought.

Infectious diseases and natural body defenses (Motion picture)
Coronet Instructional Films, 1961.
11 min., ed., color, 16 mm.
With teacher's guide.
Summary: Uses photomicrography, laboratory demonstration, and animation to illustrate the two groups of natural defenses which guard the body against disease. Explains that the outer body defenses include the skin, passages of the nose and throat, and stomach acids, and among the inner body defenses are lymph glands, the chemical antibodies, the spleen and liver, and white blood cells, which are shown ingesting and destroying bacteria.

The inflammatory reaction (Motion picture) Lederle Laboratories, 1960. Made by Sturgis-Grant Productions.
18 min., ed., color, 16 mm.
Spanish version also issued.
Summary: Uses cinematography and animation to detail the response of living tissue to trauma and injury and to point out that all inflammatory processes are the same regardless of cause. Reviews the causes of inflammation, shows traumatic reactions at cellular level, and follows, step by step, the entire inflammatory process through to tissue necrosis or the healing process. Presents the development of both gross and microscopic inflammation. Illustrates the inflammatory process in actual patients and the fine mechanisms that produce the grossly visible changes.

The ingestion of fully encapsulated bacteria by polymorphonuclear leucocytes. In vitro demonstration of surface phagocytosis (Motion picture) W. Barry Wood and Mary Ruth Smith, 1951.
15 min., sd., b&w, 16 mm.
Summary: Demonstrates the failure of leucocytes to engulf virulent Friedlander's bacilli suspended in liquid medium, showing that when the leucocytes send out pseudopods, the bacilli may be touched, but are not taken into the leucocyte. Friedlander's bacilli opsonized with specific antibody are readily taken into the leucocytes, which, when attached to a surface, engulf the bacteria when contact is made, the bacteria being trapped between the surface of the leucocyte and the tissue, the amount of phagocytosis less, however, than when the bacteria are coated with their specific antibody.

Japan's changing face (Motion picture) Prudential Insurance Co. of America. Made and released by Columbia Broadcasting System, 1960.

54 min., sd., b&w, 16 mm.
Issued in 2 parts, 27 min. each.
Telecast on the CBS-TV documentary show *The twentieth century*.
Summary: Compares the youth of Japan of 15 years ago, who worshipped the emperor, with the anti-royalist, purposeless youths of today who are torn between the discipline of old Japan and Western influence. Shows the Western influence on the entertainment, recreation, attitude toward authority, and way of living today. Interviews a psychologist, a young author, and a woman who was the only woman in her university class 30 years ago. Describes arranged marriages, and university and job examinations. Points out that students in primary schools may have an easier time adjusting to a more stabilized society in another 15 years.
Credits: Producer, Burton Benjamin.

Just what is general semantics? (Motion picture) WOI-TV, 1956. Released by NET Film Service.

30 min., sd., b&w, 16 mm. (Talking sense)

Summary: Indicates that in the broadest sense, general semantics is concerned with the factors in communication that lead to misunderstanding, tension, and conflict. Reviews Alfred Korzybski's formulation of general semantics. Identifies and discusses four elements generally associated with most human behavior: a happening, an impact, evaluating, and talking or acting. Maintains that, in terms of resultant behavior, it should be possible to distinguish between evaluations that make sense and those that do not, suggesting that by analyzing patterns of talk a person can begin to understand and prevent unrealistic behavior. Presented by Dr. Irving Lee.

1. General semantics. I. Ames, Iowa. Television station WOI-TV. II. National Educational Television Film Service. Series: Talking sense (Motion picture).

Karba's first years (Motion picture) Gregory Bateson and Margaret Mead. Released by New York University Film Library, 1951.

19 min., sd., b&w, 16 mm. (Character formation in different cultures series)
Summary: A series of scenes in the life of a Dalmatian child, beginning with a seventh-month birthday ceremony, showing the child's relationships to parents, nannies and nurses, child nurse, and other children, as he is suckled, taught to walk and to dance, teased, and tutored. Demonstrates the process by which a Dalmatian child's responsiveness is molded as parents stimulate and themselves fail to respond.

Land from the sea (Motion picture) Nova Scotia Dept. of Agriculture, Halifax, 1946. Made by Nova Scotia Dept. of Industry and Publicity. Released by National Film Board of Canada.

14 min., sd., color, 16 mm.

Summary: An account of how the flooded region along the Bay of Fundy coast is being reclaimed for farms by the Provincial and Federal Departments of Agriculture in cooperation with Nova Scotia land owners. Traces the history of the area from the time of the Acadians, who built dykes along the Fundy coast to transform useless marsh land into fertile meadows. Explains how dykes were allowed to fall into disrepair during depression years, and as the old dykes crumbled the floods came in to ruin crops, kill trees, and undermine buildings.

—Another issue. b&w.

Making a decision (Motion picture) National Film Board of Canada, Montreal, 1957.
7 min., sd., b&w, 16 mm. (What do you think? No. 8)
Summary: Poses the question of whether teenagers who often resent being told what they ought to do have the resources for making their own decisions. Gives an example of a high school girl who is determined to go to a party with her own friends rather than to a traditional family gathering, showing how she wavers from her original stand when her parents no longer insist and leave the decision up to her. The audience is asked to make the final decision.
Credits: Producer, Nicholas Ball; director, Julia Murphy; scenario, Oudrun Parker; photographer, Robert Humble; film editor, Othbert Choggett.

Maternal deprivation in young children (Motion picture) Jenny Aubry and Genevieve Appell. Released by New York University Film Library, 1953.
30 min., sd., b&w, 16 mm.
Part of a collection of studies on deprivation of maternal care, subsidized by the Centre International de l'Enfance.
With discussion guide.
Summary: Part of a record collected by a French research unit studies the effects of maternal deprivation in young children. Studies children between one and two-and-a-half years old, reared in institutions that had not provided for a stable and intimate relationship to one person, displaced several times from institution to institution, and, because of their experience of impersonal care, seriously

impaired in the capacity for human relationship. Shows some of the disorders appearing in young children deprived of maternal care for lengthy periods, and progress of children under psychotherapy, how the child gives up its needs for isolation, gradually develops a relationship to the therapist, and, at the time time, resumes development in all areas.

Mechanical energy and thermal energy (Motion picture) Educational Services. Released by Modern Talking Picture Service, 1959.

27 min., sd., b&w, 16 mm. (Physical Science Study Committee course film)

Based on the textbook *Physics*, by the Physical Science Study Committee.

Summary: Jerrold R. Zacharias uses several models to explain both bulk motion and the random motion of molecules, showing their interconnection as the energy of bulk motion turns into thermal energy of random motion. He demonstrates a model using a dry ice disc and small steel balls, in which the bulk mechanical energy of the disc is converted to thermal energy of random motion of the balls. He develops a temperature scale by immersing canisters of two gases in baths of various temperatures, reading the resulting pressures, and explaining the origin of the absolute temperature scale.

**Methods and techniques in teaching music, series 1, lesson
2: Scale song, felt board, xylophone (Motion picture)** State
University of Iowa, 1961.

24 min., sd., b&w, 16 mm.
Summary: Presents music reading readiness activities for children.
Introduces the feltboard, placing the notes on it to complete the F
major scale. Students sing the scale song, and helpers play the notes
on the xylophone, place the proper syllables under the notes on the
feltboard, and replace the notes of the feltboard.

- Microorganisms: beneficial activities (Motion picture)** Indiana University, Audio-Visual Center, 1958.
15 min., ed., color, 16 mm.
Kodachrome.
With study guide.
Summary: Contrasts various related activities of microorganisms as explained in the nitrogen cycle and the roles played by various types of bacteria in the conversion of nitrogen from one form to another. Indicates by animation that only a small number of all microorganisms are harmful, while much greater numbers are beneficial or essential. Shows the means whereby microorganisms produce changes in their environment and cause the formation of new substances. Considers the importance of microorganisms in research and their contributions to providing man with clues to the nature of life.
Credits: Producers, Malcolm L. Fleming, Warren D. Stevens; director, writer, editor, Jerrold E. Kemp; narrator, John Weigel; educational authors, Walter A. Konezka, Letand S. McClung; animation, J. W. Armstrong, Harvey B. Frye; photography, Clarence M. Flaten, Seymour Friedberg, Jerrold E. Kemp, George Vuke.

- Microorganisms: harmful activities (Motion picture)** Indiana University, Audio-Visual Center, 1958.
15 min., ed., color, 16 mm.
Kodachrome.
With study guide.
Summary: Lists the postulates developed and used by Robert Koch to prove that a specific disease is caused by a specific microorganism. Presents some of the methods developed for protection against disease and against undesirable decomposition of foods. Through animation, explains how bacteria produce enzymes and toxic waste products which may cause disease and decomposition. Discusses immunity to disease, shows the industrial preparation of vaccines and antitoxins, indicates many of the diseases against which such products afford protection, refers to the use of antibiotics and sulfa drugs in treatment of infection, and illustrates methods of controlling the spread of disease-causing microorganisms by such safeguards as water purification, milk pasteurization, and the use of ultra-violet radiations and chemical antiseptics.
Credits: Producers, Malcolm L. Fleming, Warren D. Stevens; director, writer, editor, Jerrold E. Kemp; narrator, John Weigel; educational authors, Walter A. Konezka, Letand S. McClung; animation, J.
